D2: KOPETZ S ET AL: "Coupling of optoelectronic modules to optical layer in printed circuit boards (PCBs)" PROCEEDINGS OF THE SPIE - THE INTERNATIONAL SOCIETY FOR OPTICAL ENGINEERING SPIE-INT. SOC. OPT. ENG USA, Vol. 4942, 30 October 2002 (2002-10-30), pages 282-286, XP002315409 ISSN: 0277-786X			
2 INDEPENDENT CLAIM 1			
2.1 The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claim 1 lacks novelty (PCT Article 33(2)). Document D1 discloses (the references between parentheses refer to that document): a method for producing an electrooptical printed circuit board having a number of layers with electroconductive elements

and at least one optical layer with optically conductive elements, more particularly with waveguides, at least one optical layer comprising a polysiloxane material and the elements of the optical layer being structured by casting, and the mechanical link between the optical layer and the at least one layer of electroconductive printed circuit board layers being directly linked to the production of the optical layer.

- 2.2 The current invention is also not inventive in relation to D2, since the problem addressed in claim 1, that is the manufacture of a waveguide from a polymer which can withstand temperatures of 230 degrees, for example during connecting, is already mentioned and solved on page 283 of D2: "...highly transparent and temperature stable polymer foils and epoxies are used". Although polysiloxanes are not mentioned, a person skilled in the art seeking such a polymer would consider a solution such as that in D1, since that document mentions and solves the same problem using polysiloxanes (see D1, column 11, lines 62-67). It is perfectly obvious to combine the two documents, since they both address the same problem and concern methods for producing an electrooptical printed circuit board. The application therefore also fails to involve an inventive step if D2 is taken as the closest prior art.

Box I

The newly filed claim 1 goes beyond the original disclosure of the application, since the wording "casting in a pre-structured mould" is not part of the original description (PCT Rule 70.2(c)). The newly filed sheet 1 containing claims 1-4 was therefore not taken into consideration when establishing this report.
